TRAGIC FATALITY MON- DAY IN WHICH 16-YEAR COLEMAN LAD DIED

Coleman Lad Badly Injured and Died
as He Reached Hospital
on Monday.

During heavy operations on his father's ranch a short distance north of Coleman, Arthur Lardinois, aged 16 years, was fatally injured, falling from the front of the loaded wagon, and after he had been kicked by the frightened horses, the wheels of the wagon passed over his body, as they ran away. His father, who was close by, rushed up and the boy was conscious, but unable to speak, being so badly injured, and could only indicate where he felt the pain most. Dr. Borden was soon on the scene, and conveyed him in his car to the hospital, but by the time he reached there the unfortunate lad was past human aid.

The news created quite a gloom over the town as the boy was well known and popular, and the shock was a severe trial to his parents and family.

The funeral service was held on Tuesday afternoon at the family residence, and was attended by a large number of relatives and friends, the Rev. H. D. Bevan, of St. Paul's United Church, officiating. The pallbearers were: Alfred Lardinois, Leon Paulville, Victor Hotta, T. Cornille, L. Lethbridge and Joe Paulville, of Cowley.

Many floral tributes were placed on the coffin, and the untimely death of this young man is deeply felt. The sorrowing family have the sympathy of the community in their bereavement.

CARD OF THANKS

Mr. and Mrs. Joe Lardinois and family desire to express their thanks to those who kindly loaned cars for the funeral, and also to those who kindly sent floral tributes.

Radio Broadcasting From Airplane Picked Up By A. Wilson, Local Operator

Radio Broadcasting from Aeroplane
Picked Up by Coleman People
Last Friday

Adam Wilson, who operates a Koster 6-tube set, picked up radio messages from the plane of the Forestry Patrol Service which came down from High River on Friday, Aug. 31. Following is his statement sent in to the station at High River:

"I picked up messages from a plane here between 11:30 and 12:30. The wireless operator in the plane requested anyone in Coleman, who might hear him, to signal by waving his hat or hand. I don't know which. I signalled for practically fifteen minutes, right up till he said, 'I doubt if he saw me. I have not had any signals from Coleman yet' (this presumably to High River). The operator said something about he had a hunch his voice wasn't working. I was! There was quite a bit of interference caused presumably by the propeller. I thought it best to let you know that I had tuned in on this plane, in case the signals should be important to you. The operator said something about leaving at 12:30 and left at that time, swinging east."

"The initials of what I took to be YK or YN were given."

Mr. Boulton, a local ranger, was trying to receive on a set used by the Forestry Patrol, which is of the portable kind, and the test was made to find if the set in use would receive the broadcasting from the patrol plane. Mr. Boulton states he received the code call quite distinctly, but only got the first part of the message as if the operator was calling, only the word "Hello" being heard. The plane circled over Coleman for a number of times, causing most people to wonder what the reason was, many thinking that he was looking for a landing place. Mr. Boulton placed off on the level a large letter K, formed of white tarpaulin to let the aviators know he had received their code call.

Mrs. H. D. Gay will sing in the United church on Sunday evening.

WILL CLIMB CROWS NEST

Arrangements are under way for a party of local people to make the ascent of Crows Nest Mountain, which will take place on Sunday, weather permitting. This mountain has already been climbed by a few local enthusiasts, but for over a year nobody has attempted it. G. R. Powell and Jack Wood are among those who have this distinction to their credit. The official elevation is 9138 feet above sea level.

SHOWERS FOR POPULAR COLEMAN GIRL

A miscellaneous shower in honor of Miss Elsie Haysom was given at the home of Mrs. Robert Evans on Friday evening. About forty guests were present. Bridge and whist were played, the winners at bridge being Miss May Muir first and Mrs. A. F. Short consolation. At whist, Miss Ethel Dunlop first and Mrs. T. Higginbotham consolation. Dainty refreshments were then served, after which Miss Haysom was presented with a beautiful basket of gifts carried in by little Miss Peggy Emerson and Miss Dana of Hillcrest. After opening the gifts Miss Haysom thanked Mrs. Evans and the guests in a very pleasing manner.

The bride-to-be was again honored on Monday evening at the home of Mrs. F. G. Graham, when the hostess and her daughter, Mrs. Machin, entertained about 25 guests. Cards were played and the winners were, Miss E. Dunlop first, Miss Gladys Price second, Mrs. Robert Evans consolation. Refreshments were served, after which a ship called "Elsie's Ship of Happiness" captained by Miss Haysom, a kitchen maid, was rolled in and the cargo unloaded, showing a beautiful display of useful household articles. Miss Haysom made a neat little address, asking all present to visit her new home.

High School Re-opening Program Last Friday

Formal Opening of High School Session
Featured by Interesting Program.

The formal opening of Coleman High School on Aug. 31 proved a very enjoyable affair. The chairman of the Board, Thos. Johnson, the Rev. A. D. Currie, H. Snowdon, member of the board, and H. T. Halliwell, were visitors and gave short addresses, while the students gave a short program. Duke Richards giving a reading, Mary Baron a very cleverly executed pianoforte selection and Gwen Brown, though a younger player, contributing a very pleasing pianoforte selection.

The chairman in his address referred to the record of the past year, and welcomed the staff and new teachers. Principal Hoyle dealt at some length on the examination results, giving particular mention to those students who had distinguished themselves in obtaining high marks, especially Emma Antel and Megan Jones.

WEEK'S PROGRAM AT THE PALACE

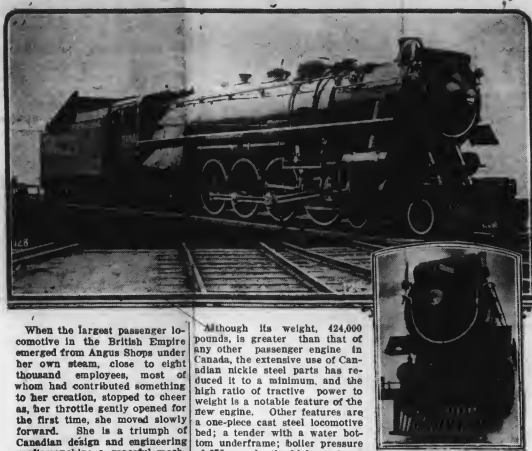

"The Tempest," in which John Barrymore is the star, will be the feature at the Palace this week-end, with a matinee on Saturday afternoon. It is an exceptionally fine picture and has played at big prices in the cities.

On Monday next will be shown the picture entitled "The Open Range," one of the finest pictures based on the novel of that name by Zane Grey. Those who have seen previous pictures and have read the novels will need no further recommendation.

For the week-end, Friday-Saturday, Sept. 14-15, "Sorrell & Son" will be the feature, of which further particulars will be given next week.

Antrob's Sell Good Shoes

Largest Passenger Engine in British Empire

When the largest passenger locomotive in the British Empire emerged from Angus Shops under her own steam, close to eight thousand employees, most of whom had contributed something to her creation, stopped to cheer at her throttle gently opened for the first time, she moved slowly forward. She is a triumph of Canadian design and engineering craftsmanship; a graceful mechanism nearly one hundred feet long, with a tractive effort of 60,800 pounds, equal to 3,685 horse power.

The new K-1-A Class locomotive has been built from designs originated in the motive power department of the Canadian Pacific Railway in the company's own shops by its own employees. Two of these engines have been constructed and they will first be operated on the Montreal-Toronto run.

Although its weight, 424,000 pounds, is greater than that of any other passenger engine in Canada, the extensive use of Canadian nickel steel parts has reduced it to a minimum, and the high ratio of tractive power to weight is a notable feature of the new engine. Other features are a one-piece cast steel locomotive bed; a tender with a water bottom underframe; boiler pressure of 275 pounds, the highest of any locomotive in Canada; and a four-wheel engine and tender of 97 feet 5 inches. There are eight pairs of wheels, a four-wheel leading truck, eight drivers, and a four-wheel trailing truck. The wheels have a diameter of 75 inches and the cast nickel steel cylinders are 25 1/4 inches by 30 inches. The coal capacity is 18 1/2 tons, and water capacity 12,000 gallons. A mechanical stoker considerably lightens the duties of the fireman.

The new design aimed at largely increased power, reduction of weight and elimination of parts. The result has shown that Canadian technical skill and workmanship is equal to the task of putting a fully equipped engine of the best type under its own power, and that the Canadian Pacific Angus shops, the second largest on the continent, are capable of yielding successfully with recognized engine building plants anywhere in the world.

Six Lives Snuffed Out in Gas Blow-out at Coa Creek Mine

Poisonous Gas from Blow-out in Coa
Creek Mine Takes Toll
of Six Lives.

(Fermie Free Press)

About 11 o'clock Thursday morning the most serious blow-out that has ever occurred in No. 1 East mine took place and as a result six mine workers lost their lives. The dead are: Geo. Perkins, aged 31 years, resided in West Fernie, has lived here for nearly twenty years; leaves a wife and three grown-up sons.

Robert Dowie, aged 54 years, lived here 38 months, leaves a wife and grown family.

Ceslo Innocente, aged 42 years, lived here over 20 years, leaves a wife and two children.

Joseph Sedrovich, 34 years of age, had resided in Fernie for 28 years, leaves a wife and a family of ten children, four boys and six girls.

Joseph Sprak, 41 years of age, has resided in Fernie for 22 years, leaves a wife and five children, three boys and two girls.

Joseph George, 53 years of age, had resided in Fernie for 29 years, leaves a large family, three of whom are young children.

Not since April, 1917, over eleven years ago, has this colliery been plunged into gloom through mine accidents taking such a toll. According to reports the blow-out occurred at some of the working faces in No. 16 slope district of the mine and the force exerted by the released gas deranged the ventilation system throughout a very considerable area. However, the fortunate part of the occurrence is that while the day shift was at work, this being the shift on which the greatest number of workers are employed, the total fatalities was six. It is also reliably reported that the property damage to the mine is very slight and thereby only a short time will be required in making repairs sufficient to put the workings back into operating condition. The six victims must all have had warning of the impending trouble because their bodies were recovered at various points at considerable distance from the supposed source of origin. One victim was about 1000 feet from his working place. All the killed were overcome by gas, this having overtaken them, it is assumed, when they were attempting to make their escape.

The force of the blow-out as indicated by the large deposit of fine coal dust throughout the No. 16 slope district must have been very severe. Hundreds of tons of this finely powdered coal covers rooms, passages and entries ankle deep according to those who have visited the mine.

Promptly upon the first alarm that trouble had occurred the apparatus at the Mine Rescue Station here under J. R. Puckey was held in readiness. The Puckey was held in readiness. Word has reached the surface of the blow-out at Coa Creek, as soon as word reached the surface of the blow-out, the pulmotor and other emergency equipment was requisitioned and many willing workers were immediately available to render aid. Shortly after noon the call for the government apparatus came, and within three-quarters of an hour Mr. Puckey was at the mine and rescue crews were in readiness to perform their grim work of relieving the trapped underground workers. Three bodies were recovered within a reasonably short time but it was not until nearly six o'clock, some seven hours after the blast, that the three remaining bodies were brought to the surface.

General Manager H. P. Wilson was among the first of the officials to proceed from here to the colliery and he personally supervised the underground activities, assisted by government inspectors Robt. Strachan and H. Mard, who were present in advisory capacity. Great praise is due the trained rescue crews who worked unceasingly until the last victim was recovered. Many other willing volunteers were on hand and everyone assisted those in charge of the rescue operations, some exerting themselves to the point of exhaustion. The gas laden atmosphere underground made these operations difficult and hazardous.

W. Bennett, miner, and his partner, W. Yates, who were at work near where the blow-out occurred, are said to have had a miraculous escape from being trapped by the fumes which resulted fatally to their nearby fellow workers. Driver James Phillips managed to get out safely but his horse was found suffocated, a distance of 2000 feet from the source of the disaster. Another driver, Mike George,

the coroner's jury, empaneled by Robert Duthie, coroner, convened at the Fernie Undertaking Parlors last evening and viewed the bodies of the victims. Adjournment was taken until today when it is proposed the jury in a body would proceed to the mine and view the scene first hand. A very thorough survey and investigation by competent mining experts will have to be made before any definite conclusions as to actual cause of the calamity can be ascertained. Word has been received from the Minister of Mines, that the chief inspector, W. Dickinson, is now enroute to Fernie to investigate the cause of the disaster, and pending his arrival just official proceedings will be held cannot be stated.

The coroner's jury consists of R. Derbyshire, foreman; George Goole, W. Watmough, James McCool, James Wilson and Frank Seriani.

NOEL LECOQ ENDS LIFE WHILE IN DES- PONDENT MOOD

Discovered at Noon on Sunday by
J. Wilson--No Reason As-
signed for Rash Act

Miner Suicides in Cellar of His Home
—Friends Unable to Dis-
cover Reason.

Following several weeks of despondency, which friends and acquaintances were unable to discover the reason for, Noel Lecoq, a miner employed at the McGillivray mine, hanged himself in the cellar of his home on Seventh Street, presumably during the night of Saturday last. The body was discovered by Jack Wilson, his next door neighbor, at noon on Sunday, he immediately notifying the police. Constable Houghton, and the constables of the Alberta provincial police, with Dr. Olivia, coroner, and Dr. Stewart and Borden, were soon on the scene, when the body was taken from the cellar. Death had taken place several hours previously, as the body was absolutely cold. Deceased was fully clothed and had made a neat loop in the end of a piece of light rope, by splicing, through which he had passed the loose end, and had placed a handkerchief around his neck, over which the noose was placed. The rope was fastened to the top of the steps. He had closed the cellar flap after descending, and evidently had thrown himself forward, so that strangulation ensued.

About four weeks ago deceased had been examined by Dr. Borden, and was detained in hospital for a couple of days. The third morning he asked the doctor if he might go for a walk, and never returned, but went back to his home, and had, lived quietly there since, refusing to converse with neighbors or friends when they called, and with the exception of the calls of the delivery boy from the store of Leosky, Ledieu & Co., and an occasional call from neighbors to keep a friendly eye on him, he was left to himself, as he appeared to resent any advances of friendship, refusing assistance of any kind.

Mr. and Mrs. Wilson, living next door, noticed him about the place daily, and had taken food to him; also Mrs. Ledieu Sr., living on the west side of his home, had performed similar services, but he would not touch it. He continued to give orders to the delivery boy so that he kept himself fed.

Early this year he purchased the lot and built a neat cottage, comfortably furnishing it, and was quite normal. He kept busy for a few weeks improving the place, then suddenly ceased, and also laid off from work. He lived alone, as his wife and son, though living with him in Coleman

A Real Menace

Summer is on the wane. The nights will soon be nippy and chill, and if we have not been careful, we are stuck up on our bank of health with a little surplus of energy during the long sunny days, we may be disgusted to find ourselves with a developing common cold.

So declares the Canadian Red Cross magazine in discussing what it characterizes as a real menace in this country. Coryza is the official name of the common cold, but the name is not very indicative of the nastiness of the disease at first blush. Coryza is a real menace. There is no other affliction that quite so universally causes discomfort or so great a loss of time for workman, business man, and school child.

A lowering of vitality means a slow-down in usefulness or production, and time lost in our busy age is a money loss somewhere, or somehow, to someone. Remembering, however, that a nation's health is a nation's wealth, we cease to think in dollars.

The real menace of a cold is its possible bad after-effect on the individual. As it is caused by varieties of bacteria very closely allied to those responsible for the pneumonias, for bronchitis, laryngitis, and possibly catarrh, it often leaves in its wake damages that are permanent.

When we speak of "catching" cold, we speak correctly, if by "catching" we mean getting it from the fellow. About ninety per cent of our colds come from him.

Very rarely one may develop his own cold, for these germs probably are ever-present in the nose and throat and will multiply and thrive should the vitality of the host be sufficiently lowered to furnish a good culture ground for their growth.

This may be effectively accomplished by avoiding fresh air and sunshine, by loss of sleep, by over-fatigue, or by living in over-heated rooms. Insufficient, improper, or excessive food or clothing assists greatly.

But for the vast majority of our colds, we may blame close contact with our neighbor who coughs, sneezes, and spits, and who uses his handkerchief to saturation and then greets us with a friendly handshake.

Ignorance of man-made laws excuses no one; ignorance or disregard of the laws of health eventually spares no one. The person with a bad cold should be regarded as having a dangerous communicable disease, and we should know enough, and our children should be taught, to avoid him. Even among people who realize this, knowledge generally outstrips practice, and on and on goes the cold.

The trouble is that the vast majority of people do not regard the common cold seriously enough. If, or their dear ones, contract tuberculosis, or are stricken down with pneumonia, they are seriously alarmed, but they overlook the fact that the common cold may be the forerunner of these and other dread diseases. "Oh, it is only a cold," they indifferently say with a shrug of the shoulders, ignorant or careless of the fact that the cold will quickly seize upon the weakest spot in the human body, whether it be the throat, the nose, the lungs, the heart, the kidneys, or elsewhere, and when at last realization comes that there is something seriously wrong it frequently is devastatingly too late.

"It is the little things in life that are causing all the strife," is an old, old saying. It is also what we ignorantly regard as the little things that are responsible for most of the ills from which mankind suffers. Make no mistake about it, the common cold is no little thing although we may look upon it as such. The after-effects of the common cold make their appearance. Better still, exercise all those precautions necessary to prevent taking a cold in the first instance.

Finally, if you can't or won't dodge the common cold, then at least don't make it necessary for your neighbor to dodge yours.

Rust Resistant Wheat

Within Three Years New Variety Should Be Available Which Will Grade As High As The Best

Within three years Western Canada should have a rust-resistant wheat which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion cerealist, who is spending a few weeks in the West, inspecting the work of the Dominion Plant Research Laboratory at the Manitoba Agricultural College and the various Dominion experimental farms in the West. He will also visit farms where rust-resistant grains are being produced for experimental purposes.

Must Be Inspected

Private Planes Must Be Tested For Air Worthiness

Hereafter privately owned aircraft in Canada will be subject to the same inspection for air worthiness as commercial planes. Announcement of an order-in-council to that effect was made. The increase in the number of private aircraft and their presence on public aerodromes have rendered the inspections of all machines advisable. It is stated, however, only commercial planes have been subject to tests for fitness for the air.

Regina Population Increases

A directory census of Regina, capital of Saskatchewan, shows a population of 55,000, an increase of 4,000 in twelve months. A similar census shows the population of Saskatoon to have increased 5,000 during the same period. It is now placed at 45,000.

Youthful Charms Enhanced By Cuticura

Soap and Ointment. Regular use of the Soap, assisted by the Ointment as needed, will keep the complexion fresh, clear and youthful and the hair lustrous and healthy. Cuticura Talcum is fragrant, cooling and refreshing, an ideal toilet powder.

Sample Free by Mail. Address: Cuticura Department, P.O. Box 128, Montreal. First, Soap Box, Ointment Jar and 36 Cuts. Cuticura Shaving Stick 25c.

New Phone Service

Inauguration Of All-Canadian Service Between Winnipeg and Montreal

Inaugurating the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Fort Arthur and Fort William, officials of the Bell Telephone Co., the Canadian Pacific Railway and the Manitoba Government spoke to one another across a 1,605 miles of copper wire recently. The new line between Winnipeg and Montreal has nine repeated amplifying stations. Its total weight is 350 tons.

A TIRED-OUT FEELING

Is a Sure Sign That the Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, N.B. She further says:—"Some years ago I was working as a stenographer, and became badly run-down. I always had a tired-out feeling, had no appetite and suffered terribly from indigestion. Almost every month I had to remain from the office for a day or two. I was advised to take one of Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I had been taking the pills very long I began to feel much better. Continuing their use with my strength came back, I regained my appetite and the terrible backache from which I had suffered disappeared. I have been married some years now and have two fine healthy children, a girl and a boy, and am in the best of health. I attribute this to Dr. Williams' famous Pink Pills, and I trust that these few lines may help some other weak, run-down people. All weak, run-down people who will give this blood-building tonic a fair trial will find it restores their new health and strength. You can get the pills from any drug store, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Demand For Canadian Wheat

Believe That Demand From Orient Will Continue To Increase

Speaking at Shaunavon, Saskatchewan, the other day, A. P. Sproule, director of the Saskatchewan Wheat Pool expressed the belief that the Orient's demands for Canadian wheat, which last year were greater than those of any three previous years, would continue to increase. He mentioned incidentally that the Saskatchewan Wheat Pool now has 925 country elevators and that the total value of 20,000,000 bushels capacity while it is also building another elevator of 6,000,000 capacity.

Nights Of Aegony come in the Trail of Asthma

The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Keen's Asthma Remedy. It banishes the frightful cough, eases the passages, and enables the afflicted one to again sleep as soundly and as peacefully as a child. It is the genuine at your nearby drugist.

Dog Fish Oil

New Industry Is Getting Under Way In British Columbia

The vicious dog fish of the Pacific Coast has at length found his niche in the scheme of things. Several years, judging by a new industry getting under way at Vancouver. Dog fish oil is the base of a preparation for keeping away mosquitoes, black flies and other insect pests which most men and beast alike shudder at. Several barrels a day of dog fish oil are being used in the manufacture of the preparation.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

To Reconstruct Rolling Mills

Manitoba Rolling Mills To Operate Plant In Medicine Hat

The Medicine Hat City Council has received word from the Manitoba Rolling Mills Company, Winnipeg, that plans are in preparation for the reconstruction of the rolling mills in Medicine Hat, entailing the installation of an open hearth furnace and that the company is contemplating the use of electricity for the operation of the plant in preference to steam.

Parks Attract Foreign Tourists

Under the policy of development and publicity being carried out by the Dominion Government the national parks are not only rendering a wider service each year to Canadians themselves, but they are adding to the knowledge of other countries and attracting to the Dominion thousands of visitors from abroad in every part of the globe.

The Family Rolling Stock

Resident Of Vancouver Makes A Most Interesting Discovery

Even the small family in moderate circumstances of today carries an amazing amount of rolling stock. Compared with the family of a generation ago, J. Butterfield, a writer of the Vancouver Province, makes the astonishing discovery that in one modern family there exists under one management one automobile, two bicycles, one express wagon, four roller skates, two scooters, a kiddie car and a baby carriage. Then there is the lawn mower, retained exclusively by one member of the family. Forty years ago a similar household contained two items of rolling stock, a baby carriage and a collection of boxes. "Is there a hoop in all Vancouver now?" asks Mr. Butterfield—Regina Leader.

Recipes For This Week

(By Betty Barclay)

SCRAMBLED EGGS

1 egg.
1/2 cup milk.
1/2 teaspoon salt.
1/2 teaspoon butter.
1 tablespoon butter.
Mix slightly beaten egg with milk and seasonings. Melt butter, pour on egg mixture and cook over a low fire. Use asbestos mat. If the fire is too hot the liquid will separate. Keep stirring with a spoon until mixture is thickened. Remove before it becomes solid and serve at once.

HOME-MADE CAKE FLOUR

To use ordinary flour in a cake recipe, from each cup of sifted flour remove 2 tablespoons of flour and replace with 2 tablespoons of cornstarch; sift twice.

STEAMED CHEESE SUFFLE

2 tablespoons butter.
3 tablespoons flour.
1/2 cup milk.
1/2 teaspoon salt.
2 eggs yolks.
2 egg whites.
Make cream sauce of first five ingredients. Add cheese, remove from fire, add yolks, cut and fold in the whites beaten stiff and dry. Put into the well-buttered top of a double boiler, cover, and cook at a low temperature until firm.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

An Important Industry

The pulp and paper industry is the most important manufacturing industry in Canada; heading the lists in 1926 for gross and net value of manufactured products as well as for distribution of wages and salaries. In total capital invested the industry is second only to electric light and power plants and in total number of employees it is second only to saw-mills.

Minard's Liniment cleanses cuts, etc.

Condensed Milk Production

Within recent years there has been a large increase in the production of condensed milk. The first milk condensing plant was established at Truro, Nova Scotia, in 1883, and there are now in Canada 26 plants for the manufacture of condensed and evaporated milk and milk powder.

Antiseptic

If you have a cut apply Minard's Liniment immediately. Prevents poisoning. Cleanses, heals.

MINARD'S
"KING OF PAIN"
LINIMENT

Experiment In Immigration

Farmers Of Western Canada Aim To Assist By Providing Winter Work For British Miners

An experiment in colonization on a scale never before attempted is now in progress in Canada. Ten thousand men from the mining districts of England, driven almost to desperation by an attempt to maintain themselves and their families upon the dole, have come to Canada to help with the harvest and to start life anew if the opportunity to work is afforded them. It is an experiment in which the British and Canadian Governments have co-operated and in which the railway companies and steamship lines are also assisting. And while the primary reason for making the attempt, the real purpose in view is to settle, once and for all, that much-discussed problem of whether or not the British-born man is any longer a desirable settler for the west.

No one can estimate how far-reaching may be the effect of the success or failure of this experiment. Failure may retard the course of British immigration to Canada for years. Failure may further the belief preached in many quarters in the Old Land, that Canada does not want the British-born. Failure may produce a general reaction which will injure Canadian prestige and Canadian credit. Success, on the other hand, will effectively silence the criticism of Canada's colonization policy. Success will give new hope and fresh confidence to thousands of Britishers who unquestionably are desirable citizens for Canada but who have been holding back because they believe they are not wanted here, or because they do not believe there exists in Canada the opportunities which are advertised. Success will enhance Canadian prestige in Great Britain and improve Canadian credit.

Speaking in Winnipeg early in August, Mr. Ramsay MacDonald, former Premier of Great Britain, pleaded for a warm welcome for these men. Such a welcome would be, he said, proof whether or not Canadians are genuine in their protestations that they are not discriminating against the British-born immigrant. These 10,000 harvesters have now arrived. Their welcome has been a warm one. The provincial governments, the railways and civic authorities have co-operated in making them feel at home. Work was found for all of them as quickly as they reached Winnipeg and all of them are now drawing wages for the first time in years.

But to welcome them is not sufficient. The harvest cannot continue until the winter months are over. To be found for these 10,000 men during the winter months or they must be sent back to England to spread stories of Canadian ingratitude and the lack of opportunity in this country. All of these men are willing and able to work. They will take any job that will net them sufficient to keep alive during the winter months. In the spring it will be easy to place them on the farms or in other forms of employment. But the winter months will tell the story of success or failure.

In providing work for these men during the winter months the farmers of Western Canada can assist more than any other agency. For the expenditure of a very few dollars during the winter months the farmer will be enabled to employ one or more of these men. It is true many of them will be unskilled labor and by the time spring rolls around the man will probably have learned enough to prove of considerable value to his employer in the plowing and seeding of the fields.

Such a system does not in the least amount of charity. It is sound business practice. For the investment of a few dollars per month the farmer will have helped during the winter and with the coming of spring he will not have to face the great problem of seeking in a highly competitive market for labor. That which he will pay out during the winter months

will be saved by reason of the fact that it will not be necessary for him, in the spring, to engage new help at high wages.

The governments and the railroad companies are spending tens of thousands of dollars to bring this experiment to a successful issue. It is to be hoped that the farmers and other employers of labor will also lend their aid in an issue which is distinctly national in all of its characteristics.

French Text Books

New Series Approved For Use In Saskatchewan Schools

An order-in-council has been passed approving the adoption of a series of French text-books for use in Saskatchewan schools. The series includes five readers and three language instruction text-books which have been under consideration by the department of education and are now favorably reported upon. All the text-books were submitted to the educational council of Saskatchewan for discussion and report in accordance with the provisions of the Saskatchewan school act.

Each of the series adopted is published by the Librairie Armand Colin of Paris, France. The series was selected out of a number examined by the department of education.

Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pain in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

The Tonic Of Trade

Reason Why Advertising Is Most Effective In Newspapers

When William H. Rankin, advertising expert, certified before the International Advertising Association to the supremacy of newspapers as medium for trade news, he simply corroborated what business experience confirms.

The reason why advertising is most effective in newspapers is because good advertising is always news, and news is expected in newspapers. — Los Angeles Examiner.

Veterinaries Use Minard's Liniment

Banff An All-Year Round Resort

Banff, Alberta, is a mecca of holiday seekers from both summer and winter. During the summer months visitors may enjoy practically every outdoor recreation. Each winter a carnival is held which is attractive to an increasing number of visitors annually, and it is predicted that Banff will soon be a world-famous winter resort.

Frank—"Charlie boasts that no living man could forge his name successfully to a cheque and get it cashed. Has he such a very peculiar signature?"

George—"No; but he hasn't any money in the bank."

SUMMER COMPLAINT

Nearly Lost Her Little Girl

Mr. Theodore Bisset, Antwerp, Ont., writes—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak, had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was back of her normal weight. I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 28 years, and it is predicted that DeWitt Co., Limited, Toronto, Ont.

MANUFACTURE OF ARMS UNDER LEAGUE CONTROL

Geneva.—Russia has refused to collaborate with present efforts of the League of Nations to obtain control of the manufacture of arms.

Maxim Litvinoff, Soviet vice-commissioner for foreign affairs, in telegraphing this decision to Sir Eric Drummond, secretary of the league, pointed out his government's contention that the league had done nothing toward solution of the problem of real disarmament.

He insisted that urgent steps should be taken to obtain definite results and avoid the risk of future wars. An attempt to supervise the production of armaments is calculated merely to mislead public opinion of holding forth hopes of real disarmament, he asserted.

Meanwhile, Canada and the United States are co-operating in an effort to bring about the widest kind of publicity concerning manufacturing of armaments. Their representatives, Ambassador Hugh Wilson for the United States, and Dr. W. A. Riddell, for Canada, voted disapproval of a draft project reported to the commission which is trying to frame a convention for the control and manufacture of arms, on the ground that it did not go far enough.

Messrs. Riddell and Wilson favored giving the same publicity to arms manufactured by governments as to arms made in private factories. Dr. Riddell contended the widest kind of publicity should not be expected to furnish statistics if countries depending on governmental manufacture were permitted to withhold such figures.

The draft provision with reservations attached will be sent to the League of Nations council, which with the league assembly will be empowered whether taking into account the difference of opinion in regard to the project, it would be wise to convoke an international conference for its discussion.

In French circles it is categorically denied that the provisional naval limitation agreement between France and Great Britain contains any secret clauses. Both British and French spokesmen report that the agreement provides for associated French and British fleets. Replies from the United States, Italy and Japan are awaited before France and Great Britain publish the text of the agreement which is described here as an effort to achieve something possible and practicable by containing what is regarded the underlying idea of the Washington naval conference, the limitation of powerful and offensive naval fighting machines.

The British explain that the agreement was placed before the other naval powers in the hope it would be accepted as a basis for discussion by the league preparatory to disarmament commission. The date of the commission's next meeting depends on the result of these negotiations.

Notes in Berlin

Berlin.—A group of communist demonstrators, protesting against the proposed construction of a new German battleship, attacked police guards here and were fired upon. Three persons were wounded seriously and a score were hurt in the rioting. Police arrested 20 after the disturbance.

Criticism is Repeated

Ottawa.—Lord Leva's Winnipeg comment on Canada's immigration policy has caused much indignation among the officials of the Department of Immigration and Colonization. These officials are very sensitive on this question as there has been much criticism of their attitude toward British immigration.

Will Continue Search

Bergen, Norway.—The Russian ice breaker Kharlov, searching for explorers and rescuers lost in the fatal Laita expedition, has proceeded to King's Bay where the Russian aviator Chukhovskiy joined the vessel. The ice breaker will continue to Frana Josef Land, where a base will be established.

Building New Town

The Pas, Man.—Surveying at the Gold Lake townsite has been completed. The new town has not been officially named but it will probably be known as Gold Lake. It is surrounded by rich mineral deposits.

Farmers Take to Flying

A farmer living a few miles north of Moose Jaw has purchased a Moth aeroplane, and it is understood that several others are about to follow his example.

Chinese Facing Starvation

Crops in Many Districts Have Been Ruined

Shanghai, China.—The population of 1,500,000 in a district 30 miles wide and 100 miles long on the border of South China, and Northwest Shantung is facing a famine situation, said Earl Baker, secretary of the New York-China famine fund committee on his return from a visit to the stricken area.

There has been sharp difference of opinion, both in China and the United States, regarding the necessity of relief measures.

Mr. Baker said he is convinced that relief must be sent at once. He stated that 150,000 persons were in an exhausted state of malnutrition and apparently doomed to death and that 30,000 were slowly starving.

Drought and grasshoppers have ruined the crops in the famine district, said Mr. Barker. He added that the grasshoppers now form part of the diet of thousands of the stricken people. One village, he said, was eating dried grasshoppers on a wholesale scale, the insects being the only food of many houses which he visited.

Declares Navy Pact

Letter a Forgery

Foreign Office Says Document is Falsely Fake

London.—We have now seen a copy of the letter which purports to have been written by Sir Austen Chamberlain, secretary of state for foreign affairs, to Aristide Briand, French foreign minister, concerning the alleged terms of an Anglo-French naval agreement, and we have no hesitation in declaring that the letter must obviously be a forgery. No communication, even remotely in such a sense as suggested has ever passed from Sir Austen to Mr. Briand.

This statement was issued by the foreign office to the Canadian Press. The document, a summary of which was published widely in the United States and Canada and occasioned a great sensation, has now been received in London and is stated to be a most patent and palpable forgery.

It is understood that the British government has cabled instructing the British embassy at Washington to deny categorically the authenticity of the document.

Little Damage From Rust

Rust Menace in Saskatchewan Did Not Materialize

Moose Jaw.—Although conditions in Saskatchewan were propitious for a heavy rust infection during the month of July, the rust menace in Saskatchewan has not materialized. This was the statement made here by M. P. Tullis, Field Crops Commissioner for Saskatchewan, following his return to this city from a 1,000 mile tour of inspection throughout the province.

"While the heavy crop stands and the succulence of the leaves and joints of the grain together with the unusual amount of moisture in the atmosphere in the month of July, indicated the possibility of heavy rust infection, the rust menace has been practically negligible," said Mr. Tullis.

Canada May Be Honored

Likely To Have Representative in Court of International Justice

Regina.—Canada may have representation on the bench of the permanent Court of International Justice in the person of either the Right Hon. Mr. Justice Duff, or of Eugene Lafleur, K.C., of Montreal, according to an announcement made to the Saskatchewan Bar Association by the Hon. N. W. Rowell, K.C., of Toronto. A vacancy has occurred on the bench owing to the resignation of John Bassett Moore, a renowned United States jurist, and the names of the two Canadians were submitted for election. "This will occur in about a month's time."

Will Continue Vaccination

Ottawa.—The smallpox vaccination commission of the League of Nations has voted that despite the development of occasional cases of sleeping sickness from vaccination there was no reason for discontinuing the practice which it regards as the most powerful weapon against smallpox known to medical science.

Commissioner Eddie Dead

Winnipeg.—Commissioner William Eddie, of the Salvation Army, is dead at Balmor, Scotland, according to word received here. For the past two years he had been in charge of the work in Western Canada.

Predicts Rapid Mail Service

Airplanes Will Aid Communication Between England and Canada

Montreal.—A rapid mail service by airship between Great Britain and Canada was forecast by W. G. Williams, parliamentary secretary to the British Board of Trade. There were two great airships now under construction in Great Britain, one by the government, the other by Commander Barney, and the latter was likely to have its trials toward the end of the year.

"I should be surprised," Mr. Williams said, "if we do not see the development of rapid mail communications between England and Canada through airships."

Mr. Williams was speaking at the first conference of the delegates of the Empire Parliamentary Association now visiting Canada. The conference was with members of the Montreal Board of Trade, the subject being empire transportation.

MORAL VALUE OF THE PEACE PACT IS NOW STRESSED

Paris.—Lord Cushenden, who signed the peace pact in behalf of Great Britain, Northern Ireland, and India, said that it was a great and historic event, but he cautioned against the reference that the activities of Secretary Kellogg, of the United States, in elaborating the treaty meant that the United States would depart from its policy of aloofness toward European complications.

"So far as this pact is concerned," he said, "it carries with it no implication that the American people must concern themselves with European matters."

The British minister emphasized the moral value of the pact, recalling that Napoleon once said that the great factor in war was the moral factor.

"So it is in peace," Lord Cushenden said. He added: "No one imagines that signing this treaty will immediately and finally banish war from the face of the earth. That would be a mistake. Possibly there will still be small wars somewhere on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Lord Cushenden said that personally he divided the credit for the negotiation of the pact between the Foreign Minister Briand and Secretary of State Kellogg, but he recalled Sir Austen Chamberlain's activities of the last few years in favor of peace, and claimed for him as much credit as for any one else in the crusade against war.

Death Of Charlie, Graham's Mother

Hollywood, Cal.—Mrs. Hannah Chaplin, mother of Charlie Chaplin, of motion picture fame, died at a hospital in Glendale. Disorders that resulted from exposure during air raids in London during the world war were said to have caused her death.

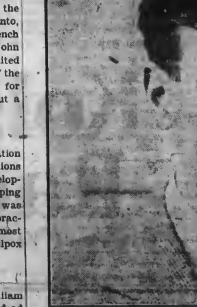

Epidemic At Athens

Athens.—Eighty per cent of the population of Athens and Piræus have been affected by the epidemic of dengue, it is now estimated. The fever was spreading in the provinces.

Prince George Crosses Canada

Arrives in Vancouver

Vancouver.—His Royal Highness Prince George, fourth son of the King, photographed aboard the Canadian Pacific liner "Empress of Australia" on his arrival at Quebec. It is anticipated that this inconspicuous portrait will earn for its subject a reputation of his brother's unofficial title—"The Smiling Prince."

DISTINGUISHED VISITOR

Sir Campbell Stuart, of London, Eng., who is in Canada to report on the merger of the Eastern Cable Co. and the Marconi Wireless Co., to the Canadian Government. It is claimed that the merger will save a million dollars to taxpayers of Canada and at the same time free the government of any further liabilities, as well as bringing the world to the doors of the people of Western Canada.

Missing Phase

Scatter.—Pieces of aeroplane upholstery and several tourist postcards, supposedly from the British Columbia Airways' plane which disappeared Saturday morning with seven persons, were picked up on the beach several miles southwest of here.

Aftermath Of B.C. Tragedy

Debris Found Near Seattle Thought To Be Part Of Wreck Of Missing Plane

Seattle.—Pieces of aeroplane upholstery and several tourist postcards, supposedly from the British Columbia Airways' plane which disappeared Saturday morning with seven persons, were picked up on the beach several miles southwest of here.

Li-Commander L. L. Bennett, directing the coastguard search for the missing plane, declared he was satisfied that the fragments of upholstery were from the giant aeroplane. He ordered the search renewed in the Peace River country. The articles were picked up by George A. Smith, fire warden, and Dr. E. E. Gleason.

With the pieces of upholstery were several fragments of felt used to insulate the body of the plane from the engine.

New Seed Cleaning Station

Announcement Made That Plant Will Be Established At Saskatoon

Saskatoon.—An announcement that the government will establish a seed cleaning station here, similar to the one operating at Moose Jaw, was made by Dr. J. H. Grisdale, deputy minister of agriculture, who is on an inspection trip through the West. Several other similar stations would be established in the province, he said. Dr. Grisdale remarked on the evident prosperity throughout the Dominion, and spoke particularly of progress in the Peace River country. He said he was amazed at the results obtained by the use of phosphates in the treatment of grain at the Scott experimental farm.

Announces Initial Payment

Winnipeg, Man.—The Central Board of the Canadian Wheat Pool, in an official statement issued by E. B. Ramsay, secretary and manager, announces that the initial payment for the 1928-29 crop will be 85 cents a bushel, basis No. 1 Northern at Fort William.

Air Mail Service

First Air Mail In Western Canada To Operate From The Pas

Saskatoon.—The first air mail service west of Winnipeg will be established from The Pas to Cold Lake, Friday.

W. Ruppelle, of the Saskatoon post office, will represent District Superintendent J. H. Hunter at the inauguration of the weekly mail service, which W. A. Rae, barrister at Cold Lake, terms one of the greatest boons ever presented to the pioneering prospectors at Cold Lake.

Formerly mail was taken to and from Cold Lake at infrequent intervals, greatly handicapping the work of the mine recording office established there last April.

The new post office will be named Kinsmen, the Cree word for "cold." Under the new system mail will reach Cold Lake every Friday, returning the same day.

Peter C. Deurie, a pioneer merchant at Cold Lake, has been appointed postmaster.

Completes Arctic Patrol

Canadian Government Ship Is On Homeward Journey

Ottawa.—The Boethic, the expedition ship of the Canadian government, has completed its annual patrol of Canada's Arctic archipelago and is now on its southern journey home to Sydney, N.S., which it is expected will be reached early in September.

This information was conveyed in wireless messages from the ship to the Northwest Territories and Yukon branch of the department of the interior.

George P. Mackenzie, officer in charge of the expedition, reported that there had been an epidemic last winter among the natives living on the coast of the Arctic archipelago. There had been 25 deaths, mostly children. With this exception, the health of the natives in Barin Island has been excellent.

INDUSTRIAL GAINS ARE MADE BY GREAT BRITAIN

M.P. Parliamentary Secretary to the British Board of Trade, addresses the Canadian Club here removed some misconceptions about the old land.

"Some people think," he said, "that Great Britain has passed the peak and begun to decline. I am satisfied that this does not represent the truth."

On an instance he pointed out that in export of electrical machinery Great Britain before the war occupied third position with the United States and Germany first. Now Great Britain leads both the United States and Germany.

"The number of people at work in Great Britain now was three quarters of a million greater than before the war, or a total expansion greater than that of Canada."

"We have made a total greater progress in the last fourteen years than you have," Mr. Williams said. It was true the Great Britain also had a greater volume of unemployment. That, too, was three quarters of a million greater than in 1914.

"We relieve the burden," Mr. Williams proceeded, "with a system of unemployment insurance which to my profound regret some newspapers describe as a dole. It is no more a form of charity than when you businessmen pay a fire insurance premium and the company pays you insurance if you have a fire."

Mr. Williams urged further development of trade between Great Britain and Canada. Trade between Canada and the United States was dollar for dollar, while Great Britain bought from Canada to the amount of two and one half dollars for every dollar's worth she sold to Canada.

"We would like to get a little of that American trade," he added. Mr. Williams compared the results of the census of production taken in Great Britain and Canada in 1924, and said that 45 per cent of the total population of Great Britain worked for a living while 36 per cent worked for a living in Canada. In other words, nine per cent more people worked for a living in Great Britain than in Canada, with 50 per cent more women working for a living.

Mr. Williams pointed out how Great Britain has been able to retain her pre-eminence at sea despite efforts made by other countries to capture it. One attempt to capture it had been made by the people of the United States. "So far as I can see," he said, "they regret it."

HOLD DIVERGENT OPINIONS ON BANK MERGERS

Winnipeg.—Divergent views on bank mergers were expressed by the presidents of two of the largest banks in Canada when they were interviewed here.

Sir Herbert Holt, president of the Royal Bank of Canada, declared it was in the public interest to have larger rather than smaller banks, while Sir Charles Gordon, who is making his first trip west as president of the Bank of Montreal, insisted that it was not in favor of mergers although he would decline to let any statement be quoted.

"In these days," said Sir Herbert, "when large amounts of money are needed we have to have strong banks. That fact has been recognized in England and in the United States. A strong bank serves the public better than a small bank."

Sir Charles said the following statement would sufficiently well suggest his position. "I don't know of anything whatsoever that would induce further mergers."

Defending Western crop conditions, Sir Herbert said the banks were prepared to advance all money that is necessary for the moving of the crops. "It is impossible to say, however, whether such money will be needed," he added.

Both men were in the city accompanying E. W. Beatty, K.C., president of the Canadian Pacific Railway company, of which Sir Herbert is a director.

Canadian Bar Association

New Officers Are Elected At Meeting Held In Regina

Regina, Sask.—With more than 50 branches in Western crop conditions, Sir Herbert said the banks were prepared to advance all money that is necessary for the moving of the crops. "It is impossible to say, however, whether such money will be needed," he added.

New officers were elected when Sir James Aikins, K.C., Winnipeg, was unanimously reappointed as president, the other officers being: G. F. Montgomery, K.C., Montreal, and L. A. Smith, K.C., Calgary, vice-presidents, with Mr. J. Aikins, K.C., Kitchener, Ont., being reappointed as secretary. The new executive will be named by the law societies of the various provinces.

The members of the association assembled, stood at attention when the resolution committee brought in a resolution on record as expressing unwavering loyalty to the King. Then, as Gordon W. Forke read a clause of the committee, expressing regret at the death of ten members of the association during the past year, the meeting stood for a moment in silence, heads bowed. The ten whose deaths were so mourned were: Albert F. Kelley, Limerick; W. Esten Lloyd, Bellingham; Gordon S. Haig, Moose Jaw; Alexander N. Grant, Estevan; Peter J. Macdonald, Regina; James Joseph McNeice, Foam Lake; John Leslie Bryant, Moose Jaw; G. F. Rowland, Earl Grey, and W. D. Morse, Rosthern.

To Aid Prisoners

Toronto (Chief Of Police Interested In Movement To Assist Ex-Convicts)

Toronto.—If given the co-operation of churches and welfare organizations, General D. C. Draper, chief of police, said he would prevail upon the federal government to assist in a movement to help ex-convicts to establish themselves in society. Declaring that he had personally paid twenty ex-convicts who had told him they were being hindered instead of helped in their endeavor to live down their past and start life again, General Draper said he advocated dominion-wide organization of churches and welfare associations to assist men leaving penitentiaries to obtain work and aid them to go straight.

Well Known Firm Injured

Saskatoon.—Ivar Austen, bewhiskered Finn, who boasts the longest moustache in Christendom, and who is known all over the Dominion, particularly in newspaper offices, was seriously injured when hit by a car here. He is in hospital suffering from a fractured skull and broken collarbone.

Cheque For Doctor Doolittle

Toronto.—Doctor P. E. Doolittle, veteran motorist, was given a \$5,000 check by the Canadian Automobile Industries in appreciation of what he has done to make motoring in Canada more available.

THURSDAY, SEPTEMBER 6, 1928

Editorial

Life in general is a most interesting study. Some take it very seriously, others very light-heartedly. Some save money, others squander it. Some have the ability to accumulate a goodly portion of this world's goods, getting a fair amount of pleasure at the same time—others, try as they might, always are hard-up and have difficulty in meeting their bills.

A good many troubles are due to lack of self-discipline. In good times people have the tendency to become careless, leaving the future to take care for itself, consequently the proverbial rainy day is unprovided for when it arrives. Others, with prudence and wisdom, set aside something to tide them over, assuring themselves a certain amount of independence, and not having to ask favors to carry them over the hard spots.

True enough, as a man sows, so does he reap, but the truth does not sink into most people's heads until they have learned from bitter experience that many opportunities for self-advancement and happiness have been overlooked and the passing pleasures of the moment have occupied too great a place in everyday life. As a general rule, we all get just about what we deserve, according to our mode of living and our outlook on life. Life is real—life is earnest—but some still say it is all a riddle.

Not a Pleading Sight

One must admit that the casual visitor entering Coleman from the C.P.R. station receives anything but a good impression. For quite a distance along the right-of-way there has the appearance of a very unkempt and neglected backyard, and civic pride is at a low ebb to tolerate it. One is apt in welcoming friends to hurry them away hoping they will not have time to view it closely, for if they judge Coleman by their first glance, it is not liable to rank very high in their estimation. At one time the railway company urged towns to give some attention to the appearance of the right of way in their limits. With that familiarity which breeds contempt, people living in a town see it so often they become accustomed to it, forgetting that the first impression the stranger receives will stick in his memory and his estimate of the town will be formed on those first few glances. With very little expense to the town an improvement could be effected.

A Retrograde Suggestion

The suggestion of the provincial minister of health, that the training course for nurses should be cut down from three to two years, has met with general disapproval, and it rightly should. The dignity of the nursing profession and its unselfish devotion to duty would not be enhanced by putting into effect the minister's suggestion, and it is hoped that the storm of disapproval will knock it on the head so effectively that it will not be given serious thought.

A Word to Parents

Principal Hoyle, in the course of his address at the high school formal opening, made a timely suggestion, to the effect that parents of students might well show their interest by attending these or similar gatherings of the students. Were parents to obtain a closer knowledge of the schools and the methods that obtain in teaching their children, they would have a more sympathetic attitude towards teachers and their work. It is of considerable interest to make an occasional visit of this nature, and well repays one for the time spent. It re-creates that human interest which plays a vital part in the success of any line of human endeavor. Parents are prone to overlook the important and vital part that school life occupies in the lives of their children, and by keeping in touch with the schools it has a good effect on staff, pupils and parents.

Tourists passing through comment on the scenic beauty of the Crows Nest Pass. There is no doubt that the grandeur of Crows Nest Mountain is outstanding in the many attractions of the Canadian Rockies and were it in the neighborhood of one of the well-known tourist resorts, would be advertised equally as much as other famous mountains.

No matter how green distant fields may appear, there is always the opportunity of making your own little corner of the world more attractive. By every individual keeping his own place clean and tidy, by keeping his buildings in good repair, and using his influence to induce others to follow suit, vast improvement can be effected in any town or village. Communities are built up from the efforts of the people themselves, not by outside influence or effort.

The way to increase business is to use every way you know to create it. Advertising is a great help.

Morgan-Haysom Wedding

Autumn leaves and flowers made a charming background in St. Paul's United church yesterday afternoon when the Rev. H. D. Bevan united in marriage Elsie Irene, second daughter of Mr. and Mrs. W. H. Haysom, to John Reynold Morgan, son of Mr. and Mrs. R. W. Morgan, of Pincher Creek.

At 5 p. m. to the strains of Mendelssohn's Wedding March played by Mr. J. Emmerson, the bride entered the church on the arm of her father, charmingly gowned in nude silk georgette, trimmed with hand painted lace, a picture hat to match and carried a bouquet of Ophelia roses.

Miss Edith Haysom attended her sister, prettily dressed in a period gown of peach taffeta trimmed with gold lace, with picture hat to match. Her bouquet was composed of pink carnations.

The groom was ably supported by Mr. J. H. Duncan.

During the signing of the register Mrs. Lance Morgan of Blairmore, sang very beautifully, "All Joy Be Thine."

After the ceremony about forty guests sat down to a wedding supper at the home of the bride's parents. The table was centred with a 4-tier wedding cake. Later in the evening Mr. and Mrs. Morgan left by motor for Spokane, Wash., where the honeymoon will be spent.

The bride's going away gown was a navy ensemble suit, with close Velour hat and a beautiful Fox fur, the gift of the groom. On their return Mr. and Mrs. Morgan will reside in Blairmore.

The groom's gift to the bride maid was a gold bracelet; to the best man, white gold cuff links, and to the Soloist a bar pin. The bride's gift to the groom was a diamond tie pin.

The Serviteurs were the Mimes' Gladys Price, Verna McDonald, May Muir and Margaret Allen.

Much interest has been taken in this wedding as the bride is a real Coleman girl, having been born here.

DURING its thirty months before the public, the Pontiac Six has earned a world wide reputation for combining six-cylinder smoothness and high-speed endurance like no other car in its field. Now, because of recent engineering advancements, to-day's Pontiac Six offers even greater smoothness and more satisfying performance than ever before.

To Pontiac's thoroughly proved design—to its Lovejoy Shock Absorbers, its 186 cu. in. engine and generously over-sized vital units—to its numerous engineering advancements, such as the G.M.R. cylinder head—Pontiac has added new Marvel carburetor, improved manifold and new distributor.

Now this lowest priced General Motors Six provides a combination of quality features never before offered in a car of comparable price. In addition, the outstanding beauty of Pontiac's "body by Fisher" has been enhanced by new, smaller wheels and larger tires.

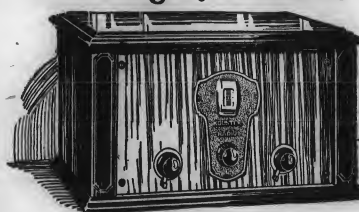

Newly refined and improved—today's Pontiac Six is more clearly than ever the value leader of its field. Drive it—and discover this truth for yourself!

A
Remarkable
Performance
in
Coleman

To show the reliability of the KOLSTER RADIO SETS, conversations from the Forestry Patrol Plane from High River were picked up on Friday last by Adam Wilson of Coleman. Though the broadcasting was sent out from a portable set operated in a fast moving airplane, in which there is bound to be slight interference from the airplane engine, the messages were picked up quite distinctly as the plane circled 8,000 feet above Coleman. No special preparations were made for receiving, as Wilson did not know the plane was here to broadcast, and just listened in to see if he could pick up distant stations.

MRS. KORMAN DIED ON TUESDAY IN HOSPITAL

Following an Operation in Effort to Save Life Deceased Failed to Rally

Mrs. Mike Korman, aged 53 years, passed away in the hospital here at 7:30 on Tuesday evening, following an operation on Monday. Some years ago deceased was operated on, and a recurrence of her complaint made a second operation necessary, but despite all that medical skill could do, death took place about 36 hours later.

Deceased is survived by her husband and one married daughter, Mrs. Sam Patterson, of Blairmore, and three sons, one of whom works in the McGillivray mine and one in the International, the other attending school. She was born in Czechoslovakia, and came to Canada in 1902, her marriage taking place some years later, and for many years the family lived at Fernie, B.C.

Noel Lecoq Ends Life

(Continued from Page One)

Several years ago, are at present living in Belgium or France, and he had been in the habit of sending them money. He was 53 years of age, and kept his home very neat, and appeared to have shaved himself previous to ending his life. He is also stated to have been very prompt in paying his bills, and was not known to be in financial difficulties, so that his friends are unable to assign any reason for his suicide.

He is reported to have lived here for about seventeen years, with the exception of a year spent at his old home, and was a competent workman.

After making full enquiries into the facts and circumstances of the past few weeks, and securing statements from the doctors and neighbors, the coroner decided an inquest unnecessary. His countrymen took charge of the funeral arrangements, and service was held on Tuesday afternoon at St. Paul's United Church, interment being made in Coleman cemetery.

DELIGHTED WITH TRIP

The party piloted by Fred Antrobus on an auto trip to Vancouver, returned on Friday evening. No unexpected incident marred the pleasure of their two weeks' holiday, not even a puncture, and they were all delighted with the attractions of the coast city, which they state are many and varied. Their only regret was they could not stay longer to become better acquainted. So interested did they become that they forgot all about writing home.

NOT A FISH STORY THIS TIME—BUT CHICKENS

Neil Fleming, chicken fancier who takes pride in his flock, purchased 30 barred rocks in April, and they were just day-old chicks when he received them from Creston, B.C. Now five of them are laying eggs. Neil states that many whom he tells this to will not believe it, but it is the gospel truth, and he considers it a very good recommend for the progenitors of such chicks as these.

HOSPITAL NOTES

Admitted on Aug. 30, Olive Dodds, with a broken shin.

John Locke, with fractured ribs, received in mine accident, and Mr. DuCroc, hip injured in mine accident.

Dr. Green, of Edmonton University, and who has practised here with Dr. Borden during the summer months of the past two or three years, was again operated on last week at Edmonton, and is reported to be making steady progress. Dr. Borden went up at the time, and was accompanied by Mrs. Borden and children.

Miss Jenkins of Calgary and Miss Jones of Hildcrest are now on the nursing staff of the hospital.

Miss K. McKrill, R.A.M.

Exhibitioner of the Royal College of Music, Teacher of Piano, Theory, and Singing.

Will resume teaching Sept. 12, 1928. Students prepared for examinations of the Associated Board of the R.A.M. and R.C.M., Primary to Licentiate.

Successes in 1928 Examinations

Local Centre (Intermediate Theory) 4.

Local Centre (Intermediate Piano) 4 (3 Hon. Men.)

School (Higher) 5 (1 Hon. Men.)

School (Lower) 5.

School (Elementary) 7 (1 Distinction, 2 Hon. Men.)

School (Primary) 7.

See the New UTILITY TRUCK

Built to Win Favor on Western Farms

EQUIPPED with the special grain body illustrated, the New Chevrolet Utility Truck is the ideal haulage unit for the Western Canada farmer.

It handles full loads with the greatest ease... enables you to cut down the time and expense of hauling... and offers dependable performance, even in heavy mud and sand. Practically every part of its chassis is oversize.

Come in and see the new Chevrolet Utility Truck! You will find that it affords everything you could possibly want in a haulage unit of this capacity—unusual pulling power—remarkable performance—amazing handling ease—and outstanding economy of ownership and operation.

Let us give you figures on its low maintenance costs.

Aluminum possesses qualities of lightness, cleanliness and protection against rust and dust which make it incomparable as a container for fine tea. You will never find that flat, stale taste in Red Rose Tea, because it is put up exclusively in ramp-proof aluminum packages.

WORLD HAPPENINGS BRIEFLY TOLD

Marshal Emile Faville, Marshal of France, and one of the great French soldiers that the war produced, died in Paris recently.

According to members of the Canadian Olympic team, much content was evidenced over the treatment accorded Canadians at Amsterdam.

What is believed to constitute a record for light aeroplane clubs has been established by the Winnipeg Flying Club, whose members have made more than 4,000 flights since the club opened on May 28 of this year.

Rear-Admiral Alfred Meyer-Waldeck, who defended Kio-Choo during the World War, is dead at the age of 64. He was appointed governor of Germany's colony on the Shantung peninsula of China in 1911.

Hon. C. A. Dunning, Minister of Railways, sailed for Quebec for Geneva to attend the League of Nations Assembly. Mr. Dunning is accompanied by Mrs. Dunning and his secretary, Miss Craig.

A \$25,000 prize for the "best and most practicable" Canadian-made United States home dry was offered by W. C. Durant, "millionaire automobile manufacturer and stock manipulator, in a cable statement from Europe.

Plans are being made for the erection of a million dollar paper plant in Winnipeg, according to advices received by the Manitoba Industrial Development Board. The Hinde and Dauch Paper Company are said to be considering a suitable site for the factory.

Through the signing at Paris of a multilateral treaty renouncing military force as an instrument of national policy, 15 nations, representing two-thirds of the world's fighting power, have agreed never again to go to war. The rest of the world was invited to take the same pledge.

John Nolan and Robert Copeman, in their canoe "Canoe Prince of Wales," have left Winnipeg via the Red River to continue their journey from Edmonton to the Rio Grande. The canoe trip is 6,000 miles long and the youths expect to complete their trip in time to return to Canada and spend Christmas in Edmonton.

Shaving Does Not Hurry Growth

Dr. Mildred Trotter has proved to her entire satisfaction that shaving does not increase the rate of growth of the beard. Precise measurements of beard shavings supplied by four students over a period of nine months were used in the test. She also found that hair does not grow continuously but in short spurts, each of which is followed by a short rest.

Rural Mail Service

Rural mail services in Canada are steadily increasing. A maximum of 3,800 rural routes has now been reached, this representing an increase of about 400 compared with a year ago. The most notable development is in the Western Provinces, more demands coming from there than from other sections of the country.

He took the bend like one possessed

His brakes refused a sudden test. N.B.—No flowers by request.

Perhaps every man has his price but in most cases it is very drastic.

Farmers' Marketing Tour

Canadian National Railway's Tour To Great Britain and Denmark, 1925

(Continued.)

Time still permitted a visit to Holyrood prior to a reception by the Lord Provost, Sir Alexander S. Ewen, at the City Chambers. Holyrood, built in the French style, is still used by the Royal Family. It has been the scene of many stirring events. Cromwell stationed some of his troops there before the Battle of Dunbar, in 1650, but his chief interest, as to us to most people, was his association with Mary Queen of Scots. In Mary's Audience Chamber we saw the little oratory where she used to pray. The bed, chairs and furniture are those believed to have been used by Charles I. The bed of Queen Mary's bedroom are hung with tapestry. The hangings of the bed are of crimson damask with green silk fringes and tassels, but that this was the bed used by Mary is doubted. The most interesting of Queen Mary's apartments is, of course, the little private room, where Elizabeth, her private secretary, was set upon by conspirators who dragged him through the bedroom and the Audience Chamber to the head of the principal staircase. There they left his body bearing fifty-six wounds.

The Picture Gallery in the Palace of Holyrood contains the portraits of kings "who," says Scott, "if they ever flourished at all, lived before the invention of painting in oil colours."

During a visit to the Quadrangle our party was photographed as a whole, the first and only time that this had ever been done.

The reception at the City Chambers was necessarily short, for we were due to reach Glasgow at 6 o'clock the same evening, but we shall never forget the cordiality of the welcome we received.

The Lord Provost and the City Council, in their robes of office, met us in the grand hall of the City Chambers. The Lord Provost, in his robes of office, met us in the grand hall of the City Chambers. The Lord Provost, in his robes of office, met us in the grand hall of the City Chambers.

PAYS TRIBUTE TO FALLEN COMRADES

As Britain observed the 14th anniversary of her entry into the great war, some 11,000 British ex-service men paid their tribute to their fallen comrades in a great memorial pilgrimage to the battlefields of France and Flanders. Among the pilgrims as a soldier rejoining his old comrades was the Prince of Wales. Above, his royal highness is seen at Bethune, walking with the mayor.

Show a Welcome

Incoming Brit-heres Should Be Given a Welcome By Their Own People

It is an obvious, although a seldom recognized fact, that the non-British residents in Canada are much more prone to assist their fellow-nationals from Europe than the British people are to lend a helping hand to their compatriots from the British Isles. When complaints are made that mid-European seem to find a heartier welcome than Brit-heres, the fact is overlooked that the welcome extended to Europeans is generally looked after by their own people already resident in the country.

The resident Brit-heres, on the other hand, pay no attention to the incoming Brit-heres. A real effort to overcome this defect, if it is a defect, might make all the difference in the world to the immigration problem.

Western Produce.

In the interests of Peace

One of the greatest of world peace, Minister of War Painleve, of France, announced that he would ask the cabinet to change the title of his department to the "Ministry of the Army." Painleve's original plan was to propose the establishment of a "Ministry of National Defence," but this could not have been accomplished without the amalgamation of the present war and navy departments.

Dieter-Walter, I've been waiting a half hour for that steak.

Walter:—Yes, sir; I know you have. If everyone were as patient as you, life would be worth living.

A soft snorer doesn't always turn out right when you are dealing with a man who is a hard lot.

SUNDAY SCHOOL LESSON

SEPTEMBER 9

PAUL IN ATHENS AND CORINTH

Golden Text: "For I determined not to know anything among you, save Jesus Christ, and Him crucified."—1 Corinthians 2:2.

Lesson: Acts 17:18-31; 1 Corinthians 2:1-16; 1 Timothy 2:3-7.

Devotional Reading: Psalm 118:1-16.

Explanations and Comments

Paul at Athens, verse 1.—After leaving Berea, Paul went on to Athens, as we learned last week. There he reasoned in the synagogue with the Jews and preached in the market place to all who would listen. Athens had a famous university and was the headquarters of the various philosophical schools; among them Luke mentions the Stoics and Epicureans; certain of whom encountered him and said, "What would this babbler say?" and others of whom said, "He seemeth to be a setter forth of strange gods," because he preached Jesus and the resurrection.

Paul addressed the waiting crowd. He referred to an inscription which had been on one of their altars, "To an Unknown God," and said that the one whom they worshipped in ignorance he declared unto them. God who made the world does not need to dwell in temples, nor does He need anything for His service.

Paul addressed the waiting crowd. He referred to an inscription which had been on one of their altars, "To an Unknown God," and said that the one whom they worshipped in ignorance he declared unto them. God who made the world does not need to dwell in temples, nor does He need anything for His service.

Making French Real

Suggest Quebec Scholarships For High School Boys

After wrestling for a generation with American boys to whom the French language was about as vital as Sanskrit, Mr. Horace D. Taft, principal of the famous private school at Watertown, N.Y., has put into effect a new idea that promises to change the whole situation. It began with a sudden resumption of the fact that just north of him is a French-speaking and French-living Canadian province. Mr. Taft thereupon wrote to the superintendent of public instruction in Quebec and asked that his boys could be placed for the summer in all French families. And now the boys are in Quebec learning French.

Of course, the parents of these boys had the money to pay for the experiment, and finding the money is always the rub. But would it be out of the question for the provincial government to offer a half-dozen Quebec scholarships each summer to Alberta high school boys and girls who had demonstrated their worth in class? French is an important curriculum subject, a great living language, and by law on a parity with English in federal matters. What is the department of education doing to make it vital to English-speaking scholars in Alberta? — Edmonton Journal.

Not Measured By Density

From Ottawa comes the estimate that the population of Canada is now 8,658,000, or an increase of 139,000 over last year. The total is not large but then prosperity cannot be measured by density of people. If it could, W. W. Houston, Ottawa, Sask.; J. S. Houston, Tyvan, Sask.

Our cynic says: All that stands between most men and the top of the ladder is the ladder.

Things are seldom what they seem when it seems as if they couldn't be worse.

**NEW beauty NEW luxury
NEW performance Plus all the
basic features which established
McLaughlin-Buick leadership**

A RADICALLY new and individual conception of the modern automobile—a sweeping improvement over all existing standards of performance, appearance and comfort—yet a strict adherence to those fundamental features which make McLaughlin-Buick the most reliable car in the world.

Such, in brief, is the story of this epochal new McLaughlin-Buick. New Masterpiece Bodies by Fisher—the most fashionable ever built—introduce an entirely new ideal of dashing, daring, debonair beauty. New adjustable front seats and extra wide rear seats provide unequalled driving-and-riding comfort. Vital engine developments impart resources of power, speed, acceleration and flexibility unapproached by any other car in the world.

And yet the basic principle—the soul of McLaughlin-Buick—is unchanged. Its world-famous, triple-sealed, valvet-head engine—sealed chassis—torque tube drive—and other proved advantages all remain as a lasting guarantee of dependability.

New beauty—new luxury—new performance—advancements equalled by no other car—plus all of the great basic features which won you to McLaughlin-Buick in the past! That is the offering of the great new 1929 McLaughlin-Buick. That is the offering which makes it the supreme car of today!

The C.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars. M-1-9-28C

A quiet wedding took place at St. Alban's Church on Wednesday at 8 p.m., the contracting parties being Edwin Williams and Catherine Elick, both of Hillcrest. Only the mother and immediate friends of the bride and bridegroom were present.

MAKIN—ELICK

On Saturday afternoon at St. Luke's Church, Blairmore, the wedding took place of William Makin and Julia Elick, both of Hillcrest. Miss Ethel Price, cousin of the bridegroom, was bridesmaid, and Charley Makin, brother of the bridegroom, acted as best man. Quite a number of relatives and friends were present from Coleman and Hillcrest. The ceremony in both cases was performed by the Rev. A. D. Currie. Both brides were born in Frank, Alberta.

The Junior W.A. will hold a social on Monday, September 17, in the parish hall at 7:30 p.m.

A meeting of the Archdeaconry of Lethbridge will be held on Wednesday of this week.

The new church of St. Augustine will be formally dedicated by the bishop of Calgary.

Superintendent Watson Leaves for Lethbridge

Supt. Watson and family of Sentinel left on Wednesday for Lethbridge, where Mr. Watson assumes the duties of city manager. Prior to leaving he was presented with a club bag and fittings by the staff and employee at the power plant. He has been at Sentinel for over a year. His successor as superintendent at Sentinel is A. Reid, of Vancouver.

Coleman Tennis Club

The draw for the secondary singles competition in the McGillivray cup event is as follows: The matches will consist of two out of three sets except the finals which will consist of three out of five sets.

Players will make their own arrangements for playing the matches and also for umpires if required.

If the play is unduly delayed the committee will fix a time for any match delaying the play and the player who fails to play at the appointed time will be defaulted.

NOTICE TO THRESHERMEN

All persons operating threshing machines and combined harvesters are required to register machine and secure thresher's license. License fee \$3.00.

Apply to
Publicity Commissioner, Department of Agriculture, Edmonton, Alberta.

H. A. CRAIG,
Deputy Minister.
